Animex Foods and Agri Plus Donate 100 tonnes of Products for Refugees from Ukraine

Animex Foods and Agri Plus commence the support for Ukrainian refugees. Meat products are being prepared and shipped to places of stay of people coming to Poland.

- Our companies have secured ca. **100 tonnes of meat products** that can be transported and stored unrefrigerated; these are mainly canned goods and dry sausages. Animex Foods donates that support via Food Banks.
- Animex Foods plant in Cracow has started the production **of bedding sets intended for, among others, Ukrainian children.**

Animex Foods and Agri Plus organize support for our Ukrainian employees and their families, either directly or with help of local authorities.

Additionally, for the citizens of Ukraine, our employees at individual locations of **Animex Foods and Agri Plus set up collections of products of vital importance.**

On an ongoing basis, we monitor and try to predict what, in the nearest future, refugees coming to Poland may need most, in the context of the dynamically changing situation in Ukraine. At the same time, we wish to express our solidarity with all Ukrainians who have been affected by this aggression.
